## AMENDMENT TO TERM EMPLOYMENT CONTRACTS

The scope of the rule preventing the successive conclusion of term contracts is extended to the same professional activity.

In addition to the increase of the compensation amount due to termination of term employment contracts, the scope of the rule prohibiting the successive conclusion of term contracts has been extended to the admission or assignment of employees in the same professional activity (and not only for the same job post or object).

Also, it is now mandatory that a term employment contract for an unspecified duration expressly refers the foreseeable duration of its term.

The employer's duty to communicate the reason for termination of term employment contracts to the supervisory authority for equality at workplace will also cover the caregiver employees.
