

TRANSPORT & SHIPPING

SRS Advogados is a full-service, multi-practice law firm advising clients on all aspects of domestic, as well as international law.

Our lawyers are focused on their clients' business and have gained knowledge and experience advising large national and international corporate groups, financial institutions, as well as local and national authorities.

We are organised by specialist practice areas and sector groups. This dynamic structure allows the firm to combine a diverse range of legal experts within a group, all of whom have relevant sector knowledge and experience. Sector groups have an extensive understanding of areas in which our clients operate and assist clients in fulfilling their objectives. We know our clients' business and regard ourselves as an active and dynamic part of it.

SRS Advogados' transport experience covers aviation, rail, road and maritime. It also extends to logistics, in particular regarding ports and airports, with our team having acquired the knowledge and skills that allows us to play an active role in each stage of every project.

Our experience is the result of extensive work with national and international clients that carry out activities in land, sea and air transportation, in both the private and public sectors.

Our work in the transport and logistics sector includes monitoring of daily operational issues, as well advising on administrative offenses, development of projects, dispute resolution (including arbitration), financing, licensing (environmental and other), negotiation, procurement and regulation.

A significant area of focus of the SRS team is in asset finance, having worked on the financing and acquisition of airframes, aircraft engines, flight simulators, railway equipment and vessels.

Through the creation of SRS Global (Angola, Brazil, Macau, Malta, Mozambique, Portugal and Singapore), as well the creation of a strong network of international relationships with third parties, we aim to extend our experience, expertise and services globally so as to ensure that we can respond efficiently to complex issues with global implications.
